Parameter

Model	FXVTL100SW/48CL/ 8XX	FXVTL150SW/48CL/ 8XX	FXVTL200SW/48CL/ 8XX	FXVTL240SW/48CL/ 8XX
Wattage (W)	100/80/60 Power Select	150/120/90 Power Select	200/160/120 Power Select	240/190/160 Power Select
Efficiency (LPW)	160			
Voltage (V)	120-277V (Plusrite) / 120-347V(Farhold)			
CCT (K)	3000/4000/5000K			
CRI	80			
Dimension	1242*266*115 mm/48.9*10.5*4.5 inch			
Operating Temperature	-40~50°C			
IP Rating	66			
Mounting	Ceiling V-Hook, Ceiling Surface, Corner Surface, Compliance of Junction Box			
Certification	cETLus, FCC, DLC 5.1 premium, NEMA 4X, ETL Sanitation (Food NSF/ANSI Standards)			

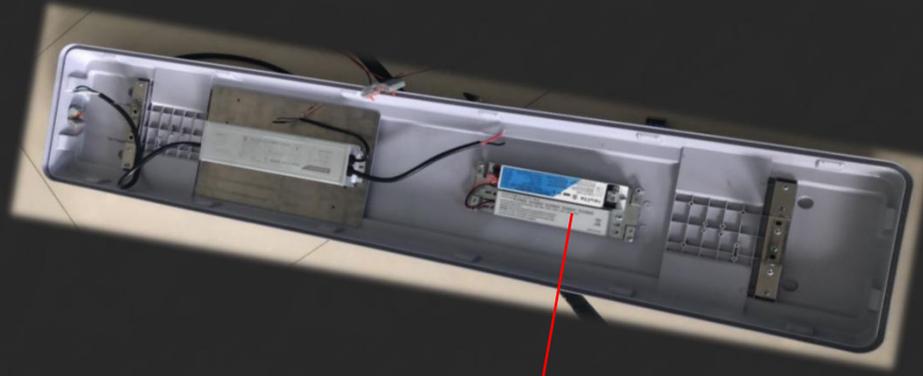

Specification

- Big Power up to 240W, watt selectable & 12V output sub-power
- More wider light distributions for high bay applications
- More Optional emergency driver and battery
- Bigger diffuser lens with Anti-Glare V.S the UFO HB
- More 1/2' NPT knockout to connect with external sensor
- More sides pre-drilled position for different built-in sensors
- **UGR meet DLC 5.1 PRE, DLC highbay category**
- Efficiency 160 LPW

Plusrite®

EM Installation

Certification

ETL Sanitation complies with North American Sanitation requirements, is suitable for human consumption, use and consumption, and is trusted by appropriate government regulators. Plusrite Vapor Tight get it and can be installed and lighted in Food Area.

NEMA is an acronym for National Electrical Manufacturers Association. Plusrite Vapor Tight meets NEMA 4X (IP66 Grade), which is water-proof, dust-proof and anti-corrosion for both indoor and outdoor.

Special Application

The car wash needs a lot of chemical detergent in the car wash, the corrosion is more serious.

The food factory and workshop has to be cleaned every 2-3 days by alkaline suds which is corrosive to luminaire body, so the housing must be anti corrosion material.
